PROJECTS

Narrative

A Story Building Organizational Application

GITHUB | <https://github.com/team-narrative>

Built using **Node.js**, **React**, **Redux**,

Firebase, **MongoDB**, **Quill** and **Express.js**.

Full-Stack project built to help users create stories, store fragmented or fully developed ideas, and everything in-between. Each user's stories are secured, that way their writing and ideas will be only available to themselves..

BASHful

Terminal Based Dating Simulation

GITHUB | github.com/Team-Dead-Ant/BASHful

Built using **Node.js**, **Inquirer**, **MongoDB** and **Express.js**.

CLI project that signs up/signs in a user, allows them to choose traits and fetches a match based on their input. The game will render a story based on the user selections which will simulate a date with their chosen match.
